

PACKSAFE

Industrial Packaging Safety Alliance

The Right Product in the Right Package

*Supporting the safe transportation and warehousing
of hazardous and non-hazardous materials*

Who We Are

A coalition of interested parties who support the safe use of industrial packaging to transport and warehouse hazardous and non-hazardous materials.

Mission

- Work toward making industrial packaging safer for people, property and the environment
 - Advocate for regulatory clarity and consistency throughout the supply chain
 - Raise awareness about the importance of selecting the right package for the right product
-

Why? Risk Must Be Managed

Sandoz Fire, Schweitzerhalle, Switzerland, 1986

Sherwin-Williams Fire, Ohio, 1987

Chemie-Pack Fire, The Netherlands, 2011

Magnablend Fire, Texas, 2011

Current Initiative: Petition OSHA

What: Petition OSHA to bring their regulations in-line with current NFPA 30 code

Why: Regulatory changes are needed to provide a consistent approach on this critical public safety issue

Initiative Elements:

- Submitting formal letter to OSHA
 - Contributing to articles in *NFPA Journal* and *Building Safety Journal* on the issue
 - Planning presentation to the Congressional Fire Services Institute
-

Support Us!

- Supporters may propose new initiatives that align with the Alliance's mission
- While unanimous support is the goal, participants may chose to either support or opt-out of issues or activities addressed by the Alliance
- Regular communications via electronic means and face-to-face meetings
